The relative valuation was conducted using Comparable Company Analysis across EV/Sales, EV/EBITDA, and P/E multiples for both Core and Broad Peer Sets. While all multiples were considered, greater relevance must be placed on the P/E multiple given Britannia's asset-light structure and low leverage. The analysis indicates lower valuation compared to the market equity value of INR 1,44,340. This suggests that Britannia currently trades at a premium relative to comparable companies.
