Live valuation research outputs & Toolkit: Jay Values [jay-finance.github.io/portfolio/]

WORK EXPERIENCE

Investment Intern - Funding & Partnerships **Bengaluru, India**
IG Defence Pvt. Ltd. December 2025 – August 2026

- Built valuation models, investor presentations, and financial analysis for a 3-person deals team across 2 fundraising rounds.
  - **Pre-Series A Fundraise ($5M, Closed):**
    - Built investor decks, comps/precedents (via Tracxn) and DCF for a $5M raise, closing at ₹375 Cr pre-money valuation.
  - **Series A Fundraise (~$12–15M, Ongoing):**
    - Built 3-statement model, valuation and investor decks for an ongoing raise, targeting ~₹1,000 Cr pre-money valuation.
  - **Valuation Report (~₹1,000 Cr Pre-Money):**
    - Built a DCF-led valuation report for the startup assessing a fair value of ~₹1,000 Cr used to pitch to an anchor investor.
  - **Corporate Development & Capital Planning:**
    - Modeled a ~₹600 Cr capex gap; designed future raises capped at ~10% dilution, protecting promoter equity above 60%.

Sales Analyst Intern **Bengaluru, India**
Bootstrap Retail India Pvt Ltd January – February 2025

- Visited & evaluated 130+ athleisure retailers, generating 20+ leads (~15% response rate) to stock the brand for expansion.

INDEPENDENT DEAL ANALYSIS

Sun Pharma / Organon Valuation and Merger Analysis: **October 2026**

- Recommended target price of $12.00 via cash + debt ($14.00 ceiling): ~73% of synergies to break even vs. ~95% at $14.00.
- Valued Organon using DCF ($7.81-8.05/share) and 5 public trading companies ($5.49-11.02/share) vs. Sun's $14.00 offer.
- Modelled Base case (Organon CFs at 9.32%, synergies at Sun's 7.87%): NPV +$135mm at full synergies, -$1.2bn at 50%.
- Stress-tested EPS accretion: 17.32% at $14.00 offer & 5.50% debt, still accretive at 7.7% with $16.00 offer & 6.75% debt.

INDEPENDENT RESEARCH

Cost of Capital - India (2nd Edition): **April 2026**

- Estimated WACC for 130 Indian companies across 13 sectors, finding average WACC rose from 9.4% to 12.5% y-o-y.
- Adopted revenue-weighted Country Risk Premium with the mature-market ERP, moving CRP from flat 1.78% to 2.1%.

Global Cost of Capital Toolkit, Methodology Paper & APAC Country Risk Premiums (CRP): **August 2026**

- Built ERP/CRP and a live RFR calculator using Power Query for 178 countries, estimating ERP (5.99%) and CRP (2.99%)
- Estimated country-specific equity-to-bond volatility multipliers for APAC, ranging 1.74x (Malaysia) to 8.14x (Taiwan).

Mature Market (S&P 500) Implied ERP Tracker: **Monthly - Live**

- Built intrinsic valuation for the S&P 500 with 3 cash-flow / growth options, solving for the implied ERP at 3.48% (Oct).
- Track and publish the implied ERP monthly on personal portfolio, giving a live, ready-to-use cost of equity benchmark.

EDUCATION

Surana College (Autonomous) **South End Circle, Bengaluru**
Bachelor of Business Administration in Finance 2022 – 2025

- **Relevant Coursework:** Corporate Finance, Financial Accounting, Securities Analysis, Business Statistics & Economics.
